```c
// This t1.c shows how to open, read files in Wanix

#include "ucode.c"

int main(int argc, char *argv[ ])
{
  int fd, n;
  char buf[1024];

  fd = open("/etc/passwd", O_RDONLY);
  printf("fd = %d\n", fd);

  n = read(fd, buf, 1024);
  buf[n] = 0;
  printf("%s\n", buf);

  // WRITE YOUR own code to divide buf[ ] into lines (by '\n')
  // Each line of /etc/passwd is of the form
  // loginName:password:gid:uid:common name:homeDir:program
  // tokenize line into loginName, pasword, gid, uid, name, homedir, program
  // write your login.c file to let user login

}
```
